To Whom It May Concern:

The plants that manufacture our Max brand products do not utilize peanuts or tree nuts in their products, or on the production lines nor do they store peanuts, or peanut byproducts, or tree nut products at their facility.

We appreciate your inquiry concerning the storage or use of peanuts, tree nuts and their byproducts at these facilities. We can confidently say that the possibility of contamination at these manufacturing plants does not exist. If you have additional questions, please contact me directly.

Sincerely,

Shawn Fear
