

## ***Team 7G***

**ENGLISH** - Students have begun to intensely prepare for the ELA test by polishing writing skills, focusing on reading comprehension, and practicing note taking strategies. Encourage students to read their RIBS book over break. RIBS #4 project is due January 11. Keep reading!

**SOCIAL STUDIES** - Students will take several weeks to complete a midterm study guide on units 1-5. Students will take two days to complete the 100-question multiple choice test during class time. The remainder of the month will focus on the major events and policies that our young nation's first few Presidents experienced.

**MATHEMATICS** - Math classes will be working on the "Hands on Equations" project followed by Solving Equations.

**SCIENCE** - We just finished studying osmosis, diffusion, and mitosis. Our next units will include classification, viruses and bacteria. Check out my Blackboard site for information. Happy Holidays!
